# NEW WORLD CHARDONNAY

In warm climates Chardonnay has a tendency to develop very high sugar levels during the final stages of ripening and this can occur at the expense of acidity. Recently in the New World, we have seen a move towards more elegant, better-balanced and less oak-driven Chardonnays, and this is to be welcomed.

A rosé (From French: "Rosé", Pinkish) has some of the color typical of a red wine, but only enough to turn it pink.
